

# Tyre Killer

**AITK-300**

- ✓ It has been developed for locations, which require very high security and a highly visual deterrent, the row of rising steel spikes will totally destroy the Tyres and RIM of any vehicle attempting unauthorized entry. The operating speed of the spike barrier is approx. is 2 seconds.

## ADVANTAGES:

- ✓ Fast raising and lowering time.
- ✓ Ideal for high security areas such as airport, bank depots, border crossing etc.
- ✓ Spike barriers are robust, safe and can be installed at any road surface.

Control system	Electric hydraulic
Input Voltage	AC 220V
Blocking Height	Upto 100 mm above the Ground
Road Passage	Upto 05 Meters
Nail Diamention	25 mm Dia, SS 304
Nail to Nail Distance	200MM - Customizable
Structure Material	MS Painted
Load Carrying Capacity	up to 40 Ton
Opening time	~2.0 Sec
Closing time	~2.0 Sec
Protection Level	IP67
Foundation	Concrete
